USSN 09/784,096  
Response to Restriction Requirement  
Dated September 29, 2004

REMARKS

Claims 1 to 58 were presented by Applicants. Claims 1-58 are subject to a restriction requirement.

The Examiner argued that each independent claim in the application recites a combination or subcombination that amounts to a distinct invention. The Examiner identified the following two distinct inventions:

- Group I, defined as claims 1-29, 36-50, 51-54 and 55-58 drawn to method and system for controlling an application using audible input over a voice channel, classified in class 704, subclass 275 and searched in class 701;
- Group II, defined as claims 30-33 and 34-35, drawn to method and system for locating a mobile unit selectively using telecommunications network audible input, classified in class 701, subclass 213 and search in class 455, subclass 456.1;

Applicants elect to prosecute the subject matter of claims 1-29, 36-50, 51-54 and 55-58 of Group I in this application, without traverse.

If any matters remain outstanding prior to allowance of the claims, the Examiner is invited to contact the undersigned attorney at (415) 875-2358 or via e-mail at [dbrownstone@fenwick.com](mailto:dbrownstone@fenwick.com). Applicants acknowledge that a copy of any electronic mail communications will be made of record in the application file per MPEP § 502.03.

Respectfully submitted,

Scott Allen Stouffer *et al*
